PART I BACKGROUND

Introduction 5
What We Know 6
Gray Areas and Missing Pieces 6
Committing the Imagination to Attending the Essential Knowledge 7
Cybernetics (First Order) 7
Second Order Cybernetics 9
My Perspective 11
Bruce Lee’s Cybernetic Precedent 12
The Cybernetic Model 13

1 Time: Historical Considerations 15
Clues from the Historical Evidence 15
Who Owns the Cattle? 16
Tribal to World Class Status and Domination 17
World Cross Country 18
Marathon 21
Track 22
National Teams: The Paradox of Talent and Achievement 25
Implications for U.S. Runners and Road Racing 30
PART II  BIOLOGICAL FACTORS

2  Place: Environment and Adaptations  35
   Training Hard vs. the Ability to Train Hard  35
   Is There Genetic Evidence?  36
   Medium Altitude and Hypoxia  37
      Oxygen at Altitude  38
      Cardiovascular System Changes  39
      Pulmonary System Changes  40
      Metabolic Changes and Fuel Sources  40
   Heat Stress Adaptations  42
      Anatomical Adaptations  42
      Physiological Adaptations  43
   Pastoral Lifestyle Adaptations  44
   Muscle Fibers  44

3  Physiological Models and Limitations to Endurance  49
   Physiological Models: Institutional Scientific Dogma vs. New Science  49
   The Cardiovascular/Aerobic Model  50
   The Energy Supply/Energy Depletion Model  51
   The Muscle Recruitment (Central Fatigue)/Muscle Power Model  52
   Running Economy: The Biomechanical Model  53
   The Psychological/Mental Model  53

4  Lactate  55
   Troublemaker or Secret Weapon?  55
   Lactate as a Fuel Source  56
   The Lactate Shuttle  57
   The Lactate Paradox  58
   Lactate Threshold and Training  58
      Cardiovascular System Changes  59
      Pulmonary System Changes  59
      Metabolic Changes  59
   The Crossover Concept  60
PART III CULTURAL FACTORS: HOW THEY DO THINGS

5 Sociological Forces 65
  Behaviorism: Creating the Individual 65
  Socialization 65
    Primary Socialization 65
    Secondary Socialization 66
    Gender Socialization 68
  Globalization 68
  Social Channeling 68
  The Road to the U.S. 69

6 Running in a 40 mph Headwind 73
  Their Own (in the U.S.) 73
    Why is Diet Important? 74
  Training: From Casual to Organized 75
  Kibet Cherop: On the Roads (Haraka, Haraka haina Baraka) 76
  Reuben Chesang and Simon Cherogony: Thinking like a Mzungu 79
  Elly Rono: Don’t Call the Police, We’re Just Running for Our Supper 81
  Friends, Rivals, or Friendly Rivalry? 84
  Hillary Lelei: How to Get Somewhere in Blowing Rock, NC 85
  Their Own Worst Enemies 87

7 Kenyan Cultures 89
  Shortcomings in the Bush: Second and Third Order 89
    Cybernetics and Ethnocentrisms 89
  Kenyans are Great Runners Except for the Ones that Aren’t 90
  Lineage 90
  Traditional vs. Modern 91
  Geography 92
  Beliefs 92
  Passions 93
PART IV  PSYCHOLOGICAL FACTORS: HOW THEY SEE THINGS

8  Belief and Knowledge Systems  97

What is African Philosophy?  97
Ethnophysics  97
Belief Systems: It Depends on How You See Things,
   Religion vs. Spirituality  98
Second and Third Order Cybernetics and Belief Systems  99
Knowledge Systems: Selection Based on Intuition;
   Experience vs. Reason  99
Second and Third Order Cybernetics and African
   Knowledge Systems  100
Sagacity or Sage Philosophy  101
Hermeneutics  101
   Cricket  101
   Baseball  102
   Kenyan Running  102
Universalists  103
   Cybernetics, Ethnocentrisms, and the Way They See Things  103

9  Inside the Mind of the Highly Evolved Runner  105

Second and Third Order Cybernetics and Western Psychology  105
Western Sport Psychology  106
   Traits  107
   The Interactional Model  107
   The Information Processing Theory  108
What is the Kenyan Equivalent to Western Sport Psychology?
   Traits  109

10  Psychological Anthropology  115

Cognitive Sciences and Anthropology  115
Schemas and Connectionism  116
Kenyan Runner Schemas
   Why are you great runners?
CONTENTS

What made you start running? 117
Is your cultural upbringing helpful for being a professional runner? 118
Is there a correlation between initiation and running? 118
Does initiation make you mentally and emotionally tough? 119
What do you do to mentally prepare for a race? 119
Do you have anxieties or lack of confidence going into a race? 120
As a professional runner, how do you stay focused? 120
Who (or what) are you running for? 121

PART V  ANALYSIS: CYBERNETICS AND REVERSE ENGINEERING

11  The Cybernetics of Kenyan Running 125
The Kenyan Ethnosystem 125
Environmental-Biological Model 126
Adaptations and Gene Expression 126
Ability to Train Hard 126
Cultural Model 127
Channeling 127
Ascetic Lifestyle 127
Psychological Model 128
Traits and Cognitive Socialization 128
External Factors Model 129
Transition to Modernity 129
Globalization 129
Contributing Factors and Theories 130
Possible Factors and Theories 130
Speed Gene 131
Initiation and Circumcision 131
Emotional Strength 131
Pain Threshold 131
National Pride 132
Performance Enhancement 132
Decolonization of the Mind 133
12 Cultural Evolution and Behavioral Expression 135

Tabula Rasa vs. Human Sociobiology and Evolutionary Psychology 135
The Junk in the Trunk Mystery 137
Social Darwinism 138
Essentialism vs. Historical Factors 138
Internalizing Conflicting Schemas 139
Ethnosystem 140
Gender Roles 140
Knowledge Systems: Socialization to Education 141
Belief Systems: Spirituality to Organized Religion to Spirituality 142
Essentialism vs. Individualism 142
How will Resocialization Play Out? 143
What Country or Ethnic Group Will Dominate Next? 144

13 Third Order Cybernetics 147

Evolving Historical Western Schemas 147
Ethnocentrism and New Social Science 147
Olympics vs. Road Racing 148
Gender Roles 149
New Science 149
Barriers to Knowledge 150
Politics: Scientific and Institutional Dogma 151
Political Correctness and Taboos 152
Constructive Dialogue 152

Endnotes 155

Appendices

Appendix A Glossary 163
Appendix B \( \text{VO}_{2\text{max}} \) Test — Elly Rono 167
Appendix C World Road Racing Rankings 173
Appendix D World Cross Country Championships (Men) 179
Appendix E World Championships Indoors 187

FOREWORD

After graduating from the University of Southern Indiana in 1998, my life changed: I decided to become a full-time runner. Initially, things did not go as expected, as I was going from one city to another in search of paid road races. That led me to Washington DC for a race. There I met Randy Mayes who later became interested in writing a book about Kenyan runners. Since then he has been a friend to me.

In running, focusing is the most important ingredient; most people like to refer to this as the sports psychology. My self motivation has enabled me to accomplish what I have. My running abilities may have also come naturally because running is such a big part of the Kenyan culture. Compared to other sports, however, runners do make that much money—so, it is more of an interest in running that has kept me devoted.

For now, my goal is to run faster times. I'm hoping that everything will be good on my side. I have realized that running sub 2:10 is not an easy thing to do, but with speed work, long runs, hill work, tempo runs, and planning, this will be an easy goal.

Randy has been a very helpful person to me several times during my running career. More than one time I stayed in his house in Washington D.C. waiting for a race. We drove to different cities together—Baltimore, twice to Pennsylvania, and a number of road races in the Washington area. For all these activities, Randy was a huge help to me and other Kenyan runners. For someone to be doing all this without any pay in the U.S., I know he has to be great friend who loves running.

We have had many discussions about sport psychology and the mental preparation that runners need to succeed. I personally find it to be the most effective part of my success in running marathons. I have made all kinds of changes in training from when I started pro running. When I was making a critical decision to adopt new training methods, Randy was one of the people who helped me.

Elly Rono, professional runner from Nandi
Acknowledgments

I am extremely grateful to the Duke community for its support—Alumni affairs, Carson Holloway, Richel Ansano, and the East Campus Trinity Café which was equipped with a generator and free gourmet coffee during the 2002 ice storm and power outages. My special thanks go to Professor Mudimbe, one of Duke’s most respected and decorated intellectuals, for reviewing my manuscript.

I am also grateful to the following people for their insight: Syed Shariq, Ph.D., introduced me to the esoteric field of cybernetics. Stuart Umpleby, Ph.D., taught me the intricacies of second and third order cybernetics. Valentin Helou advised me on categories of intelligence to gather and modeling techniques. Brian Cantwell Smith, Ph.D., helped categorize intelligence. Richard Moon, MD, led me to George A. Brooks, Ph.D., who was gracious enough to review the biology section of my manuscript. Brian Bergemann and Rafael Escamilla, Ph.D., provided technical analysis of preliminary physiological testing. Naomi Quinn, Ph.D. and Claudia Strauss, Ph.D. walked me through the basics of their book on cognitive anthropology. Wayne Hurr, Ph.D. and Gregory Dale, Ph.D. provided insights into Western sport psychology theory and practice. Susana Zabala de Uteras, Ph.D., provided insight into the concept of self and consciousness. Robert Daniels, Ph.D. and John Jackson, Ph.D. provided a balance of old school/new school ethnography. Hiram Kibui and runner Ben Kapsoiya assisted with Initiation. Manager Konstantin Selenivich and his Russian runners in Rockville, MD provided their cultural perspective. Kwasi Wriedu, Ph.D., Grant Farred, Ph.D., and Alphonse Mutima all provided an African perspective to view the African psyche. Road racing rankings were provided by Lucas Meyer, an intern at Running Times magazine. Track and Field News granted permission to use their track rankings.

Thanks also to Frank Gagliano, the Reebok Enclave, and the many Kenyan runners allowed me to interview them and offered their friendship: Eliud Barmgetuny (Nandi), Joshua Cheplaga (Kipsigis), Simon Chege (Sabot),
Ki bets Cherop (Tugen), Reu ben Cheru iyot (Nandi), Reu ben Chesang (Tugen), Peter Githuka (Kikuyu), Milka Jipdirhir (Nandi), Margaret Kagari (Kikuyu), Ben Kapsoiya (Makwet), Joseph Kariuki (Kikuyu), Simon Karori (Kisii), Kefah Keraro (Kisii), Daniel Kihaara (Kikuyu), Joseph Kimani (Kikuyu), Julius Kimtai (Kipsigis), Amos Kipyegen (Tugen), Paul Koche (Nandi), Daniel Komen (Keiyo), John Korir (Kipsigis), Shem Kororia (Saboat), Augustus Kuvutu (Kamba), Hillary Lelei (Nandi), Felix Limo (Nandi), David Maritim (Kipsigis), Andrew Masaii (Saboat), Leonard Mucheru (Kikuyu), Joseph Muchuka (Kisii), Jimmy Muindi (Kamba), Paul Mwangi (Kikuyu), Joseph Nderitu (Kikuyu), John Ngugi (Kikuyu), Nelson Njeru (Kikuyu), Sammy Nyamongo (Kisii), Elly Rono (Nandi), Peter Rono (Nandi), Emily Samoei (Nandi), Vincent Temu (Kisii), Paul Tergat (Tugen), and Daniel Too (Nandi).
